

ColorPrint Sublithin™

Competitor print and cut material isn't formulated for sublimated jerseys. What this means is that if you apply a regular printable polyurethane vinyl onto a sublimated garment, the sublimation inks will migrate – or bleed through the vinyl. ColorPrint™ Sublithin was specially formulated to work with most Eco-Solvent and Solvent based inks to block this dye migration and keep your graphics looking beautiful on any kind of sublimated polyester garment! Great for motocross, soccer and hockey jerseys with full sublimation.

Adheres to:

- 100% Polyester
- 100% Cotton
- Poly/Cotton blends
- Leather
- Sublimated Polyester

Specifications:

- PU Composition
- Polyurethane backing
- Matte or Gloss finish
- 4.3 Mil
- Recommended 45° blade
- Layering NOT recommended
- Required Mask: **TTD EASY MASK**

Compatible with Eco-Solvent & Solvent based printer/cutters.

Heat Application:

Pre-heat for 2-3 seconds

15 seconds

265° F / 130° C

Medium Pressure

Peel WARM

Washing:

Do NOT dry clean.

Machine wash WARM with mild detergent.

Hang item to dry.

NO chlorine bleach.

Turn garment inside out.
