Cooley  **Weatheryte®**

Cooley  **Weatheryte® Lite**

Weatheryte is a **16oz.** technically advanced waterproof awning fabric, which offers the luxurious look and feel of a woven fabric but has all the benefits of a high performance composite vinyl. Weatheryte can be decorated with conventional techniques & all colors can also be easily digitally printed.

Weatheryte Lite offers the same overall benefits of Weatheryte, but its lighter weight offers easier handling. With its **11oz.** lightweight scrim, it still makes the perfect fabric for applications where protection from the environment is key, such as boat covers and bimini tops, flags, awnings, banners and so much more.

Its also the perfect fabric for applications where protection from the environment is essential, such as boat covers and bimini tops, flags, awnings, banners and so much more.

Just like Weatheryte it offers the luxurious look and feel of a woven fabric but has all the benefits of a high performance composite vinyl.

COOLEY-BRITE®

Cooley's original backlit sign and awning material, Cooley-Brite **20oz.** comes with an eight year warranty. This membrane features a scrim design that is nearly invisible to allow for maximum light diffusion, consistent translucency and brilliant eradicable colors in backlit signs and awnings. Cooley-Brite is treated with anti-wick, ultraviolet stabilizers, fungicides and whiteners for excellent color protection, durability and long life.

COOLEY-BRITE® II

This **20oz.**, flexible, eradicable, top-of-the-line sign and awning membrane possesses all the advantages of the colored Cooley-Brite and more. Cooley-Brite II features the added protection of Cooley's Coolthane® formulation, which enhances cleanability and extends the life of the product to ten years.

Order a few yards or by the roll! NEPCO delivers your awning materials with the lowest minimums in the Northeast!

COOLEY-BRITE® LITE

This product also offers an eight year warranty. Cooley-Brite Lite is based on the same proven technology as Cooley-Brite. Cooley-Brite Lite is lighter in weight, **16 oz.**, offering unique flexibility for ease of installation. As with Cooley-Brite it is translucent, flexible, durable and is engineered for high color brilliance and consistent color transparency.

HOLIDAY®

HOLIDAY is an **12.95oz.** acrylic coated 100% woven polyester flame retardant fabric (600 denier) utilizing a proprietary process to coat both the top and bottom, thus allowing the fabric to be completely reversible. Its Flame Retardant properties allow it to pass California State Fire Marshall, NFPA 701 and CPAI 84 specifications. HOLIDAY, the hottest flame resistant fabric.

Additional High Quality, High Performance Fabrics Coming Soon to NEPCO!

Roll Size: 86.5" x 32.81yds

4217-540 Navy (Shown)

VALMEX® NAUTICA LIGHT

This fine yarn polyester fabric with single side high quality coating is light weight with a high tear-out force and continued tear-out force resistance. These characteristics are appreciated by boat owners who want to store their tarpaulin without effort in a small space on their boat deck. VALMEX® Nautica Light includes a single side PVC coating and a single side special acrylic paint and this optimizes the dirt characteristics and the resistance against decay and it minimizes the maintenance. Please refer to the cleaning procedures. VALMEX® Nautica Light is the ideal material for applications that need easy handling, optimal protection and handsome impressions such as deck chair and tree tarpaulins, protective covers, removeable sun sails, etc.

Colors: Snow-White, White, Tan, Ivory, Black, Blue, Navy & Gray
Special-Order Only Colors: Ocean Green & Silver

Roll Size: 86.5" x 32.81yds

4227-121 Tan (Shown)

VALMEX® NAUTICA LIGHT (Coated Both Sides)

The PVC coating on both sides and the special acrylic painting of this fine yard polyester fabric permits problem free cleanings of both sides. The advantages of the coating of both sides include, in addition to the good cleaning characteristics, mainly the fact that the material can be sewed as well as welded with all popular welding processes. The special canvas pressing (which makes VALMEX® Nautica Light available with a silver color) provides in addition a noble appearance. Due to its coating on both sides, VALMEX® Nautica Light both side is especially appreciated for convertible tops or car tops, Bimini tops, sun protection tops, etc.

Colors: Snow-White, White, Tan, Ivory, Black, Blue, Navy/Gray & Gray
Special-Order Only Colors: Silver

Roll Size: 86.5" x 32.81yds

4240-502 Blue (Shown)

VALMEX® NAUTICA HEAVY

This high-strength polyester fabric provides highest tear-out force and continued tear-out force resistance. The characteristics for the longterm use are especially improved by the use of low-wick yarns. The special finish of low-wick yarns prevents water from penetrating the fabric. This reduces mildew to a minimum and bothersome mold stains are a thing of the past. The dirt and cleaning characteristics are further optimized by the application specific PVC coating and the single side painting. The smooth surface pressing provides a noble impression. Due to the high resilience of the fabric and the good material handling, VALMEX® Nautica Heavy has an excellent image with boat owners especially for applications that include transport tarpaulins and car tops, convertible tops and access covers.

Colors: White, Tan, Ivory Blue, Navy & Gray

Roll Size: 84.5" x 32.81yds

4233-706 Gray (Shown)

VALMEX® NAUTICA LINEN

The tightly woven polyester fabric has a high quality, single sided PVC coating. The fabric has a weight of 400 g/m² and provides high tear-out force and continued tear-out force resistance. VALMEX® Nautica Linen is finished single sided with a special paint, which optimizes the dirt characteristics and the resistance against light and weather impacts. The incidence of mildew stains is significantly reduced due to the high quality, anti fungicide finish. In contrast to the other Nautica® options, VALMEX® Nautica Linen has a noble linen pressing, which gives the fabric a noble structure.

Colors: Blue & Gray

Introducing Recasens High Performance Fabrics

NEPCO is proud to be affiliated with Recasens USA. 100% Solution Dyed Acrylic Marine, Awning, Umbrella Fabrics, Waterproof Marine products, PVC coated fabrics, Outdoor Furniture and Shade Screen fabrics.

Recasens is the leading awning fabric in Europe!

S.A. Recasens is a fifth generation, family owned business founded in 1886. Recasens owns its own spinning, weaving, coating and finishing facilities, as well as offering full service R&D, design and testing services. Recasens USA has built its reputation as a powerful force in the textile industry by manufacturing high performance textiles, including the top rated Recacril® 100% solution dyed acrylic marine and awning canvas.

Recasens is the chosen supplier for many leading OEM manufacturers in the Marine and RV industries. **Customers include Care-free of Colorado, manufacturer for the global OEM and Aftermarket RV market, and OEM boat companies Stingray, Cobalt, and Rinker power boats and Ameritex Fabric Systems to name a few.**

MOST POPULAR

100% Solution Dyed Acrylic Marine & Awning Fabric

SUPER TIGHT WEAVE!

Zero shrink and Zero stretch with exceptional water and fade resistance in a full collection of 59 Solids and 79 Stripes.

Limited Five Year Warranty

Available 47", 60" & 98" Rolls

COLORS UPDATED IN 2009

With 59 Solids and 79 stripes in the Recacril® Line, Recasens is the company that delivers the styles and colors you want for your Commercial, Residential or Industrial customers and projects.

Proven in Europe, with over 50 years of experience, the Recacril® line is perfect for awnings, marine and other outdoor applications. With its tight weave, Recacril® provides outstanding water resistance and fabric stability.

NEPCO also offers **Recacril Binding (in 3/4" & 1" TET Bias)** and acrylic braiding to compliment any awning installation. Turn to page 39 for more information!

NEPCO Carries the ENTIRE Recasens Line!

RECSCREEN SHADE SCREEN

RecScreen® polyester shade screen filters UV rays and improves air circulation. RecScreen's antibacterial, lead-free coating and fire-retardant characteristics provide additional value to the environmentally conscious consumer. RecScreen's 118-inch width is unique in the industry, making it highly efficient during production and adaptable for a variety of applications in the shade screen product marketplace. Each type of screen has a different tolerance of the weave. Recscreen 4000P has 1% openness of the weave; RecScreen 5000P has 5.5% openness of the weave and RecScreen 6000P has a 3% openness of the weave.

4000P Patterns: White, White/Linen, White/Sable, White/Pearl, White/Charcoal, White/Vanilla, Linen, Black & Black/Bronze

5000P Patterns: Solid White, White/Linen, White/Sable, White/Pearl, White/Charcoal, White/Cream, White/Bronze, Solid Black, Black/Charcoal & Black/Vanilla

6000P Patterns: Solid White, White/Linen, White/Pearl, Solid Sable, Sable/Pearl, Sable/Charcoal, Solid Black, Black/Bronze, Solid Pearl, Pearl/Linen, Solid Charcoal, Charcoal/Vanilla & Solid Vanilla

**SEAQUEST
Marine Upholstery Vinyl**

Nassimi's brand line of team performance fabrics, introduces Seaquest - A 32oz. Marine Upholstery Vinyl. The Seaquest Line is part of a collection of performance engineered vinyls for Contract Furniture, Marine Upholstery, and other seating applications that require superior material strength and high-durability. Each product is engineered to exceed the specific demands of the application, for example in flame resistance, stain resistance, anti-bacterial and anti-microbial protection, UV-resistance, or cold crack.

OSEA EXTRUDED
Double Pressed Polished Scratch Resistant

The O'Sea glass is the newest of Vinyl Window Clear technology. O'Sea has formulated the base compound for maximum UV stability and the press polishing process ensures optimized clarity. The O'Sea coating is specifically engineered to provide a superior scratch resistant barrier without compromising the hand or flexibility of the sheet. This unique chemistry also gives the O'Sea sheet exceptional chemical and stain resistance. O'Sea is manufactured of thermoplastic vinyl material.

SKU	Description	Size
OSEA-5DRUM-040C	Clear Window Vinyl (5 Rolls per Drum)	54" x 110" x .040
OSEA-3DRUM-040C	Clear Window Vinyl (3 Rolls per Drum)	54" x 110" x .040

REGALITE EXTRUDED
Double Pressed Polished Marine Grade Sheets

Regalite® press polished sheets are manufactured of thermoplastic vinyl material with a highly polished finish to form a flexible, press polished sheet. These products offer superb dimensional stability, excellent clarity and weathering capabilities, good RF and heat sealability. Each meets or exceeds the material requirements of the Department of Transportation (DOT) and the American National Standards (ANSI)

REG-3DRUM-030C	Clear Window Vinyl (3 Sheets Per Drum)	54" x 110" x .030
REG-3DRUM-040C	Clear Window Vinyl (3 Sheets Per Drum)	54" x 110" x .040

MAKROLON AR
Abrasion-Resistant Window Clear

Abrasion and enhanced UV-resistant polycarbonate sheeting that offers glass-like clarity and hardness, coupled with the impact strength of standard polycarbonate. With its superior glass-like clarity, Makrolon AR offers less distortion compared to other marine clears and has 250 times the strength of standard float glass. Its also scratch-resistant coated on two-sides and is highly UV / yellow resistant. Makrolon AR comes with a 5 Year Weathering Warranty and a 10 Year Breakage Warranty.

Easily Sewn Using Standard Equipment!

.040" and .060" Makrolon AR can be sewn using a diamond-tipped needle. Depending on the thread gauge, you may be able to use a #23 or #24 needle. Its been successfully sewn with a V-138 thread using a #23 needle. Its also recommended to use a very sharp needle and a new needle is recommended for each job.
