JS LED is the BRIGHTEST and Truest White MINI

Luxembright is the BRIGHTEST SHORT LED

Yes! This is NOT A TYPO!

Luxembright is the BRIGHTEST STANDARD LED

JS Super LED The Overall Brightest LED at just \$3.61/module!

Module prices listed are based on full box price. Piece prices may be higher.

The test above was completed at NEPCO in May 2010. Using a calibrated LUX meter (with a grey survey scope), we took LUX readings of various WHITE LEDs through two types of white acrylic. The LED light source for each product was 1ft of fresh product. Each product was illuminated in a 4" x 12" channel (4.5" return) constructed of Brite White aluminum. Acrylic used was 7328 (white) and the newer 2447 (white) acrylic.
